

Command	Description
<code>docker --version</code>	Show Docker version
<code>docker info</code>	Display Docker information
<code>docker pull nginx</code>	Download an image
<code>docker images</code>	List images
<code>docker run nginx</code>	Run a container
<code>docker run -d nginx</code>	Run in detached mode
<code>docker run -it ubuntu bash</code>	Run interactively
<code>docker run --name myapp nginx</code>	Run with a custom name
<code>docker run -p 8080:80 nginx</code>	Map host port to container port
<code>docker ps</code>	Show running containers
<code>docker ps -a</code>	Show all containers
<code>docker stop myapp</code>	Stop a container
<code>docker start myapp</code>	Start a stopped container
<code>docker restart myapp</code>	Restart a container
<code>docker rm myapp</code>	Remove a container
<code>docker rmi nginx</code>	Remove an image
<code>docker exec -it myapp bash</code>	Open a shell inside a container
<code>docker logs myapp</code>	View container logs
<code>docker inspect myapp</code>	View detailed container information
<code>docker volume create myvolume</code>	Create a volume
<code>docker volume ls</code>	List volumes
<code>docker network ls</code>	List networks

Command	Description
<code>docker network create mynetwork</code>	Create a network
<code>docker compose up -d</code>	Start Compose services in the background
<code>docker compose down</code>	Stop and remove Compose services
